

ROLLERI®
**PROFESSIONAL
BENDING**

**DIRECTLY
FROM THE
MANUFACTURER!**

PRESS BRAKE TOOLS

**FAST CLAMPING SYSTEMS, ADAPTERS,
SERVICE/MODIFICATION,
SHEAR BLADES, ACCESSORIES**

WELCOME ...

... to the new Rolleri catalogue!

Rolleri is one of the few **real manufacturers** of press brake tools – not a reseller and not a dealer. Therefore we emphasize great importance as being **producer** of press brake tools to bring you further advantages.

- no margin division
- direct access to the production
- direct communication, not only by specific and special bending tools.
- Competent and truthful statement about prices and delivery times – without tedious queries!

Convince yourself of our service and quality of tools!

THE COMPANY

Since 1987 we have been producing standard and special tooling. The family owned company (Francesco and Marco Rolleri) can nowadays be considered one of the largest press brake tooling manufacturers in Europe. We are internationally available with our branches Rolleri Brasil, Rolleri USA, Rolleri India, Rolleri Deutschland GmbH, Rolleri China, Rolleri Ukraine and Rolleri Benelux, for you to utilize our global experience and footprints.

We offer fast and reliable service through our partners in all of Europe. In 2012, we have completely restructured our facilities internally. The focus of direct sales structures in the individual countries has greatly improved. We present to you, a new expanded portfolio, a significantly enlarged stock, new corporate design, and a completely new catalog that you now hold in your hands. Our promise to an alternative for you Worldwide.

THE TEAM

The Rolleri team is made up of all ages. We are innovative, dynamic and experienced, with consistency and harmony. Our mission is to bring you the best results in tool production. At Rolleri teamwork is the key to achieve outstanding customer service, research and development, great warehouse efficiency, and vast productivity.

The exceptional atmosphere in our facilities always has a positive impact on our products.

Rolleri Videos

Company Presentation
www.rolleritools.com/videos/company-rolleri

THE PRODUCTION

All production phases are certified and up to quality check standards and safety regulations. Thereby we guarantee you consistent high quality with modern CNC-machines.

All tools are laser marked with a serial number. Thus, allowing every single tool to be identified and easily tracked for reproduction.

This is what we call accurate repetition.

THE WAREHOUSE

We at Rolleri, have a wide stock ranging over more than 20,000 press brake tools. Therefore, we hold one of the largest in house stocks in all of Europe. For you this means a vast amount of tools to choose from ready to be shipped all around the world.

Look for this symbol in the catalogue!

THE SERVICE

We understand that finding the right tool for the right application is of your importance. Thus, we have invested hard work into our quality service:

- Consulting,
 - Technical assistance,
 - Training for your bending specialists,
- this is our daily business bringing you great support!

Check out our **website: www.rolleritools.com**

... also this is customer service:
Rolleri provides you with immediate production after a purchase has been made to ensure the fastest delivery time!

THE CONSTRUCTION

Besides constructing many special tools, our research and development team also innovates special clamping systems which increases your productivity. Technicians and Engineers develop for you solutions which are economic and practical.

We work with highly complex 3D simulation models and are capable to create bending examples of various profiles.

Inquire with us today!

THE QUALITY

Rolleri ISO 9001:2008 certified.

To be your choice supplier means much more to us; together we can find the best and most economic tool and develop a vast number of bending solutions.

We also offer training for your employees in the bending department. These are qualities, where we are glad to assist you along with our extravagant number of bending products.

THE QUALITY CONTROL

An extra quality control department reviews and tests every single tool after a complete production cycle.

Every tool is given a serial number and batch number, after being carefully examined. This process guarantees a 100% retracing possibility of the tool.

Of course Rolleri also guarantees accurate reproduction, high-quality material, induction hardening, and precision grinding.

THE RAW MATERIAL

The raw material is obtained from qualified suppliers which compose the chemical formulas according to international standards. Therefore, guaranteeing high resilience and tensile strength.

THE PRESS BRAKE TOOLS

Rolleri manufactures all tools in their own production facilities. We put great importance into our precision grinding, guaranteeing accurate reproduction of tools, exact concurrency. We induction harden all tools at 54-60 HRC to get the best results for your punches and dies. Each tool is subjected to quality control and then provided with a serial number to simplify and guarantee tracking.

INNOVATIONS

Rolleri produces for many press brake manufacturers the clamping systems - whether they are hydraulic, pneumatic, or manual.

Our new QuickLock-System, compatible for our Rolleri Type R2 or our new ROL 100 for Rolleri Type R1, are all new developments from Rolleri which are manufactured in our production facilities.

Synthetic Dies	228 - 229

ROLLERI MARK FREE BENDING

Prevention of Bending Marks

One of the challenges of bending is to prevent the profile of having bending marks, such as; scratches and abrasions on the surface areas.

Especially of Profile made of:

- Stainless Steel
- Aluminium
- painted metal panels

It is often the case of a line building from the contact of the sheet metal with the die. This is the cause of friction of sheet metal on small radius.

In order to prevent this markings, the following solutions are possible:

- Bending Foil
- PU-Upholstery
- Plastic Dies
- enlarged opening radius on special T-Dies

Our Advantages – Your Convenience

- Prevention of scratches and abrasions on bent sheet metals
- No post-processing necessary, therefore time and cost saving
- No contamination of bended pieces
- increases the product quality
- easy handling

T-Dies (TR) with an enlarged opening radius for the prevention of bending marks see pages 54-55, 60-61

ROLLERI **SPECIAL AND HEAVY DUTY TOOLS**

Explanation of Special Tools	232
Explanation of Heavy Duty Tools	233
Heavy Duty Tools	234 - 235
Examples of Special Tools	236 - 238
Dies with Rollers	239 - 241
ROL6-System	242
Panelling Tools	242
BLACKFIRE	243

Our Advantages – Your Convenience

- in-house construction and production (no reseller or dealer)
- competent consulting
- client specific developments
- tracking of every tool possible, with a unique serial number on every article after the quality control check
- precision grinding (tolerance of +/-0.01mm)
- guaranteed tool reproduction
- exact parallelism
- bending tests upon request

Special Tooling for:

- Z-Profiles
- Hat-Profiles
- Trapezoidal Profiles
- Pressed contours
- Foldings
- Hinges
- Radii
- Beads
- Special Profiles
- etc.

Material

The raw material is obtained from qualified suppliers which compose the chemical formulas according to international standards. Therefore, guaranteeing high resilience and tensile strength.

Material Type	Mechanical resistance of the material and the tool body	Hardness of the material and the tool body	Hardness of the operating surfaces after induction hardening
42CrMo4	900-1150 N/mm²	29.1 - 36.9 HRC	54 - 60 HRC
C45	560-710 N/mm²	12 - 15.5 HRC	54 - 60 HRC
1.2767	830 N/mm²	22 - 25 HRC	54 - 60 HRC

- Specifications for the maximum press force kN/m are indicated as such, **1 t = 10 kN**.

Our Advantages – Your Convenience

The bending of materials with extreme high resistance, (Hardox, Weldox, etc.), has developed into an important task.

The Heavy Duty tools of Rolleri are built and finished for these challenges.

Tools that have a press force up to 4000 kN/m, offer you many production possibility.

Our many years of experience in the area of special and heavy duty tooling, along with our own developing department, guarantee you functional and economic solutions in the bending sector.

From the compatible tang to the punch onto the compatible die; we manufacture everything in our own production facilities.

Take advantage of the direct contact to the manufacturer and the benefits which come along with it.

ROL6-System

Our Advantages – Your Convenience

- various V-Openings: 40-360 mm (1.57-14.17 in)
- Instructions:
 - secured manually with steering wheel
 - driven by gear motor or
 - CNC-system

While using the manual version, the opening is set in place by a turn of the steering wheel, or with a gear reduction which is attached to the die.

The automatic version, on the other hand, is operated by a control panel. The standard system does not come with the CNC-Connection for the press brake. It is available upon request at an additional cost.

The base of the ROL6-system is 720 mm (28.35 in) wide, but can also be fitted onto narrow designed tables. There is a adapter available in order to secure the system onto a table with a width of 400 mm (15.75 in). The inserts in the opening radius are exchangeable. The standard version comes with an opening radius of R=10 mm (0.39 in).

Die weight: approx. 1 ton/m

ROL6

42Cr: 900-1150 N/mm²

Panelling Tools

Our Advantages – Your Convenience

- in-house construction (no reseller or dealer)
- production according to your specifications
- tracking of every tool possible, with a unique serial number on every article after the quality control check.
- precision grinding (tolerance of +/-0.01 mm)
- exact parallelism
- use of the best materials, guaranteed high resistance and tensile strength

BLACKFIRE

The Unique Coating

Rolleri BLACKFIRE is a particular coating of your tools which defines itself by its increased corrosion resistance and special design.

The chemical treatment permanently solves the problem of oxidation.

The top surface of the metals changes through the phosphate process. It builds phosphate-like crystals, that attach themselves chemically on the substance. This improves the durability of the surface against corrosion.

Your equipment will have a long-term lifecycle left unchanged. The glossy black color of BLACKFIRE is compatible with the new technology and that allows a unique and esthetic look which connects well with the advantages of it.

You can have the BLACKFIRE treatment on all standard tools with a surcharge of 30%.

Please note that the delivery times vary by a BLACKFIRE Treatment.

Our Advantages – Your Convenience

- no corrosion
- better gliding by the exchange of tools
- appealing design
- long-life cycle

ROLLERI SERVICES / MODIFICATIONS

Our Machine Park

Our comprehensive machinery with state-of-the-art technology ensures you the highest quality in tools.

In addition to the manufactured standard and special tools, we perform all modifications individually according to your requirements.

Take advantage the modifications to reduce costs and increase the productivity of your existing tools!

CNC-Milling

With our state-of-the-art milling centers we can do your modification requests fast, precise and with high-quality.

Swivel milling heads with high swivel range allows flexible and universal production.

This is where, grooves, gaps, and openings are created.

CNC-Profile Grinding

Our CNC-Professional grinding machines guarantee, highest precision ground (tolerance of +/-0.01 mm), accurate parallelism and repeatability.

Here you can also retrofit induction hardened and core hardened tool pieces. Radius and angle modifications are percisely grounded after your measurements.

Hardening

The surface areas of the tools are exposed to the highest mechanical stress. Due to the fact that, the whole press force of the press brake machine is focused on small surface of the sheet metal. Therefore the stress is very high on these surfaces. During the bending process of the sheet metal, friction occurs.

For more resistance strength the hardening of the surfaces can be increased. The depth of the hardening must be at least 3 mm to avoid deformations. We use the electromagnetic technique also known as induction hardening to the best quality for your money's worth.

Quality Control and Laser Marking

After the laser marking, tracking of every tool is possible with a unique serial number on every article. Therefore the tracking of your tools is guaranteed and a new productions with the exact same meaasurements (angle, radius, hardening, etc.) is possible. This step is happens after quality control.

Individual markings are upon request possible.

EDM Wire

By using EDM wire, hardened and very tough material can be retrofitted. The process is operated based on a CAD-system which can also process high dimensions such as special shapes.

ROLLERI MODIFICATIONS

ROLLERI ACCESSORIES

Supporting Arms and Back Gauge

RIF-Supporting Arm

Model	Length mm (in)		Weight
RIF500	500	(19.68)	7.0 kg
RIF1000	1000	(39.37)	12.0 kg
RIF1500	1500	(59.05)	17.0 kg

- for secure support for high volume sheet metals
- greater surface guarantees a trouble-free support for sheet metals
- easy handling

RP-Back Gauge

Model	Weight
RP500A	8.0 kg
RP500B	8.0 kg

- ensures for the correct positioning of tools on the press brake and secures herewith the exact border distance.
- fast and exact repeatability
- easy handling

AS FIX

Shear Blades

We manufacture in our company over more than 20 years shear blades.

High-quality steels are finished according to your specifications.

Please provide us with the following information:

- What material are you cutting with your machines: Steel, Stainless Steel, Aluminium, etc.
- How thick is the material in diameter?
- How often to you use your cutting machine? (per hour, day, week)
- How many upper and lower shear blades are needed?

New production and retrofitting service: fast, economic, precise!

ROLLERI SHEAR BLADES

Shear Blades

Our Advantages – Your Convenience

- own production
- custom production
- depending on the cutting material
- high quality Materials
- 4-, 2- or 1-sharp
- with threaded holes or bilateral reduction
- hardened according to your specifications and request

Press Force Table

The press force table is based on the press force caliper and is very useful to those who deal with sheet metal profiles. It can assist you from the projection of profiles, to technical construction, to the buying of tools, and to the finished profile from the press brake machine.

In the first left column the thickness of the sheet metal is noted as (S). In the three first lines you can find the die width (V), the minimum boarder (B), and the ideal inner profile radius (Ri).

By crossing the thickness with the die width, you will find the necessary press force per meter. Furthermore, depicted are the span of 5 different die widths. The correction factors are found below in the table.

420 N/mm²																				
S (mm)	4	5	6	8	10	12	16	20	25	32	40	50	63	80	100	125	160	200	250	V
